

CASE STUDY

GEMS WINCHESTER SCHOOL DUBAI

CASE STUDY

GEMS Winchester School, Dubai, has a mission to provide quality education to its 2,700 students. Its choice of curriculum reflects the school's international outlook. They believe that the ability to think globally and as an innovator has never been as vital as today, which may become even more vital for the next generation of graduates.

Rachelle Racal, Primary Maths Curriculum Leader, was kind enough to share her experience working with Whizz Education for the past eight years and using the resources with the virtual tutoring solution, Maths-Whizz.

THE RESULTS

The data provided by Whizz Education via its scaffolded and differentiated personalised virtual tutor, Maths-Whizz, is very detailed and reliable for our management reporting and supports us for the annual inspection.

By using the Maths-Whizz Suite, teachers are able to effectively maximize instructional time because Maths-Whizz provides support in marking, planning, and data management. whilst the virtual tutor will continually assess students' strengths, weaknesses, attainment and progress and produce easy to read formative and summative reports as a by-product of learning.

The reporting centre shows our teachers the topic strengths and weaknesses of their individual students and each class, enabling our teachers to take the necessary corrective steps.

Whizz Education also provides a library of over 1250 interactive lessons to support teachers and students in the classroom. These Teachers Resources can be used for whole-class or small-group instruction and are a perfect complement to the virtual tutor.

Importantly, parents are delighted to have access to their child's activity and reports via a parental account through which they can gauge their child's progress in maths.

They can view the reports at any time, and then in more detail at our Parent-Teacher evenings.

GEMS Winchester is so delighted with the impact the virtual tutor has had that it is now being rolled out to 10 FS classes, bringing the total number of classes using Maths-Whizz to 85.

“Our results in Maths have been soaring since GEMS Winchester School started its partnership with Whizz Education. We can see attainment and improvement among the students who now have a solid understanding of maths which will equip them well when the subject becomes more complex.”
