

MEET THE SCHOOLS RAISING STANDARDS WITH WHIZZ EDUCATION

At Whizz Education, we raise standards by partnering with each school on an individual basis to achieve learning outcomes; in 17 years, we've never met two schools with identical needs. But don't just take our word for it...

MONKFIELD PARK PRIMARY SCHOOL - CAMBRIDGE

"Maths-Whizz is an excellent programme that, as a school, we have been proud to use for many years. Previously we have used it to focus precise interventions for our pupil premium children or those that require topic-specific interventions in maths. We work closely with our Maths-Whizz Education Success Partner, who has provided training for staff (before school closures) and even motivational trophies and medals for those children and classes who are achieving the 3 recommended progression points per week.

Since lockdown and school closures, we have spread Maths-Whizz across the whole school. When the children found out that they would all get a Maths-Whizz account, they were thrilled. We now have a virtual trophy that, as maths coordinator, I award each week to the class that has made the best use of Maths-Whizz. This is easy for me to monitor because Maths-Whizz sends me a weekly report of our statistics. I also send messages to individual children in each class that have performed well, awarding them stickers for their superb effort.

The best thing about Maths-Whizz is that the topics and levels are tailor-made for each pupil, so you can set it as a class task without the need to differentiate, as this is already built into the program. You can also set allocated topics to coincide with other work that is taking place in maths, and again it will differentiate this to match each individual child's current level of understanding.

The online webinars that are available to support the use of the software have been a great help for the teachers alongside those that are available for parents to join in with too. Maths-Whizz has been a simple way to easily set effective work during school closures that requires very little planning, marking and monitoring. All it needs is a little motivational message each week to remind the children that their usage is being monitored, and there is a prize up for grabs (albeit virtual) for the best achieving class.

My own daughter uses Maths-Whizz and happily works through the tutor section before completing the tasks independently to gain her progress gems. As a parent, it requires very little support and explaining, and she is able to move through topics that she finds challenging and gain understanding at her own pace."

Natasha Johnson: Maths Coordinator

CRIFTINS CE PRIMARY SCHOOL, SHROPSHIRE

Criftins

Church of England Primary School

“Maths-Whizz is a unique learning platform used consistently to engage our pupils in learning mathematics outside school hours. Pupils enjoy using the programme as it meets the need of each individual child. We have used Maths-Whizz for several years, and support from the company has been consistent; it feels like a partnership! Children who use Maths-Whizz regularly make progress. There is enough scope and excitement to challenge the most able and those who need support at every level. This is a unique programme with huge potential.”

Mrs Mandy Jones: Executive Headteacher

OUNDLE CHURCH OF ENGLAND PRIMARY SCHOOL, NORTHAMPTONSHIRE

“The learning platform is engaging for the children and the algorithm allows the content to be specifically targeted at all the children’s needs, for every topic in the math curriculum.”

Tracy Tracey: Year 6 Class Teacher and Maths Co-ordinator
